

1. polyaluminium chloride (PAC)

polyaluminium chloride (PAC) is a common coagulant used in water treatment. It is a yellowish-brown powder that dissolves in water to form a clear solution. The solution is used to remove suspended solids and turbidity from water. The pH of the solution is typically between 4 and 5. The solution is used in a dosing system to add a controlled amount of PAC to the water being treated. The PAC solution is then mixed with the water to form a floc, which is then settled out of the water. The settled floc is then filtered out of the water, leaving the treated water.

2. :polyaluminium chloride (PAC)

3. :polyaluminium chloride (PAC)

4. (1). polyaluminium chloride (PAC) is a common coagulant used in water treatment.

2). polyaluminium chloride (PAC) is a common coagulant used in water treatment. The pH of the solution is typically between 4 and 5. The solution is used in a dosing system to add a controlled amount of PAC to the water being treated. The PAC solution is then mixed with the water to form a floc, which is then settled out of the water. The settled floc is then filtered out of the water, leaving the treated water.

3). polyaluminium chloride (PAC) is a common coagulant used in water treatment.

4. :polyaluminium chloride (PAC) is a common coagulant used in water treatment. The pH of the solution is typically between 4 and 5. The solution is used in a dosing system to add a controlled amount of PAC to the water being treated. The PAC solution is then mixed with the water to form a floc, which is then settled out of the water. The settled floc is then filtered out of the water, leaving the treated water.

5. :polyaluminium chloride (PAC) is a common coagulant used in water treatment.

6. :polyaluminium chloride (PAC) is a common coagulant used in water treatment.

7. :polyaluminium chloride (PAC) is a common coagulant used in water treatment.

8. :polyaluminium chloride (PAC) is a common coagulant used in water treatment.

9. :polyaluminium chloride (PAC) is a common coagulant used in water treatment.
