

Welldone HPMC has good instant and fast dissolution, high transparency and high viscosity.

Advantages of use in detergents: 1. As a nonionic thickener, the viscosity of the thickened surface active system is relatively stable with temperature, and it is not easy to freeze as with NaCl. 2, electrolyte resistance 3, improve the system fluid, has a sense of brushing, while making the cleaning effect smoother, improve skin feel, improve hair dry and wet combability but it is easy to condense in cold water
