

**Super Agarbatti Binder (SAB)** is the best replacement of traditional joss powder, an environmental friend green chemical.

Joss powder is a natural product mainly from vietnam, mixing rate with wood powder and charcoal powder at 1:10(max). On traditional production, there need a lot of spaces for the stock of joss powder and need lot of costs on transportation.

SAB is a special [polyacrylamide](#), special made to incense stick industry, features with very high viscosity, less adoption, less production costs and environmental friendly.

**Usage:**

Mix 1kg SAB with 15-50kg wood and charcoal powder, mixing for 5-8 minutes after add water, then start production.
