WELLDONEFLOC polymer is widely used in mineral processing industry, such as

G 0 h H S 1 v е r \mathbf{C} θ p d e Z i n С N r a \mathbf{m} i n \mathbf{m} ${\mathbb T}$ r þ a ħ Ė tı m Ð ì 0

n g

In most mineral processes where there is a flocculant requirement for either sedimentation or centrifugation, then a high molecular weight polymer is desired. WELLDONEFLOC anionic polymer has ultra high molecular weight which ensure best performance and cost efficiency for sedimentation or centrifugation.

We are manufacturing full range of anion/cation polymers from low to high for all kinds of processing need.
