

Redispersible polymer powder is produced by spray-drying special water-based emulsion, mostly based on vinyl acetate and ethylene, acrylic. It dissolves in water easily and quickly forms emulsion.

Application Range:

- Waterproof mortar
- Tile Adhesive/Tile joint filler
- Flexible waterproof putty

Key Properties:

- Higher flexural strength
- Excellent waterproof
- Improved workability
- Increased impact and abrasion resistance
- Improve abrasion resistance, durability, wetherability

Packaging and Storage:

A. Standard Packing: In 25kg bags out HDPE bags inner with LDPE bags

B. Big Bag or other special packages are possible on request.

Store it in a cool, dry place below 30°C and protected against humidity and pressing, since the goods is thermoplastic, storage time should not exceed six months.
