

Features:

Super fine **SAB** is the best replacement agent of joss powder from vietnam , the product is in very high viscosity and stability ,very quick in dissolving which need only 5 minutes for 100% dissolving,it's an environmental friendly chemical, easy to control and less prdouction costs.

Usage:

Machine-made incense stick: mix SAB with wood powder, charcoal,etc by rate of 1:15 to 1:40, mixing them with water for around 5 minutes, then it is ready to use. Take around 2 to 5 times to find out the best mixing rate.

Hand made incense stick: mix SAB with wood powder, charcoal,etc. at rate of 1:20 to 1:35, mixing them in water for 5 minutes, then ready to use. For hand made incense stick, customers should use medium viscosity SAB for production, because it is too sticky.
